

ZOE GRACE SALON

Your Exclusive Salon Experience

Touch Up Kit Directions - YouTube Channel Zoe Grace Salon link:
<https://youtu.be/-eVJNGG020Y>

\$50 Supplies:

- 1 sample of skin stain protectant
- 1 pair of gloves
- 1 syringe of 15 grams of your customized hair color formula - colored and thicker
- 1 syringe of 15 grams of developer (hair color activator) - white and thinner
- 1 processing cap
- 1 applicator brush
- 1 hair color bowl(if \$55)

Timing: Hair color is good in kit for up to 12 hours. After that the color is bad and you will have to bring the syringes back for a refill at \$45. Can be purchased every 4 weeks

Prep:

This Root Hair Color will work best on clean dry hair, especially for grey coverage. Be sure to take off all jewelry and any expensive clothing. We recommend wearing an old button down shirt. The hair color will stain and ruin clothing. Before starting look in the mirror after watching the video and with the clean applicator brush, practice sectioning hair. It is a lot harder doing your color in front of the mirror on your own then it looks. Everything is backwards. Then take your time.

Step 1. Brush out hair(not too much scalp stimulation). Apply stain protectant around hairline and over your ears.

Step 2. Squeeze out hair color tube and developer tube into the color bowl and carefully mix for 1 minute being sure that you do not get any concentrate of pure tones (no baking soda bites in your cookie). Do not whip the product vigorously, keep folding until they are well blended.

Step 3. Apply mixed color to your hairline in front of your ears. Try to keep color within your new growth area only. Next apply color to your part line. Section out a small section(1/8inch) of hair behind hairline and apply color. Then apply on both sides of your part line. If your hair parts or splits in your crown area carefully apply a small amount of color to that area. We recommend, if you are quarantined with a partner, to get help applying in this area.

Step 4. Remove gloves and apply processing cap. For stubborn grey we process 45 minimum then the hair color deactivates. We do not recommend leaving color on longer then 60 minutes.

Step 5. Hop in the shower and do 2 nice massaging shampoos and be sure to condition.
